PRODUCT BRIEF | COMPETITIVE IP

IDiyas Competitive IP Radar

Automated Patent Intelligence, Competitor Watchlists & Forward Citation Surveillance

STRATEGIC IP SURVEILLANCE & EARLY WARNING

Patent disclosures represent the earliest public indicator of competitor R&D investments, product roadmaps, and M&A trajectory. IDiyas Competitive IP Radar transforms unstructured USPTO disclosures into real-time, automated intelligence. Monitor competitor velocity, track broad CPC technology shifts, discover incoming forward citations to your crown-jewel assets, and export verified evidence dossiers—all in one unified platform.

1 Competitor & Assignee Surveillance

Track Corporate Entities, Filing Velocity & M&A

- **Real-Time Watchlists:** Monitor corporate assignees, emerging startups, and key inventors across active USPTO filings.
- **Patent Velocity Metrics:** Benchmark publication frequency against 7, 30, and 90-day equal baseline historical windows.
- **CPC Expansion Signals:** Immediate alerts when a competitor files into novel technology domains for the first time.
- **Personnel & Co-Assignees:** Detect inventor mobility across firms and joint development agreements with third parties.

2 CPC Technology Class Landscapes

Sector-Wide Innovation & Whitespace Mapping

- **Broad CPC Class Tracking:** Follow entire 3-digit CPC classes (e.g., G06 Computing/AI, A61 Medical Sciences, H04 Telecom).
- **Deep Subclass Coverage:** Automatically monitor all underlying subclasses (G06F, G06N, G06T) under a unified watchlist.
- **Macro Trend Identification:** Spot emerging patent clusters, whitespace opportunities, and cross-industry technology convergence.
- **Document Filtering:** Isolate newly issued patents vs. pending pre-grant applications (pgpubs) with zero noise.

3 “What Changed?” Activity Stream

Chronological Event Feed & Supporting Evidence

- **Aggregated Intelligence Feed:** Real-time stream of newly published patents, allowances, and assignee title changes.
- **Deterministic Evidence Cards:** Every signal includes verified USPTO document badges, direct links, and contextual explanations.
- **Period Delta Benchmarking:** Compare document counts, active subclass shares, and inventor counts against equal prior periods.
- **Zero False Positives:** Signals are strictly anchored to canonical publication dates and verified assignee records.

4 Patent Attention & Citation Radar

Defend Crown Jewels & Track Third-Party Citations

- **Forward Citation Inbox:** Automated triage inbox alerting you whenever a competitor cites your strategic patents.
- **Relationship Classification:** Classifies citing entities as External Competitors, Self-Citations, or Continuation Families.
- **Citation Network Graphs:** Interactive visual mapping connecting citing companies, patent families, and technology classes.
- **Evidence Brief Exports:** Generate structured Markdown & PDF citation dossiers for executive and legal review.

DELIVERY, EXPORTS & AI AGENT ECOSYSTEM

Weekly Tuesday Alerts

- **Automated Email Digests:** Delivered every Tuesday directly matching USPTO weekly publication schedules.
- **Targeted Intelligence:** Summarizes new grants, pgpubs, and competitor shifts across your watchlists.

Enterprise Data Portability

- **1-Click CSV & Excel:** Export watchlists, event feeds, and citation metrics for custom modeling.
- **Markdown Briefs:** Clean dossiers formatted for instant sharing in Jira, Notion, Slack, or memos.

AI Agent & MCP Ready

- **Model Context Protocol:** Native MCP server support for Claude Code, Gemini CLI, and Cursor.
- **REST API Endpoints:** Query watchlists, stream activity, and retrieve citation graphs programmatically.

In-House IP Counsel

Defensive & Offensive Strategy

- Detect competitor infringement & continuation filings early.
- Monitor citation threats against crown-jewel assets.
- Strengthen freedom-to-operate (FTO) reviews.

R&D & Engineering Leaders

Innovation & Roadmap Benchmarking

- Benchmark competitor innovation velocity & headcount.
- Spot emerging technology paradigms before market launch.
- Avoid duplicative patent filings and IP thickets.

M&A, Strategy & Investors

Corporate Development & Diligence

- Uncover stealth startups and undisclosed technologies.
- Assess target patent quality and inventor retention.
- Track strategic pivots before public announcements.

ACTIVATE YOUR COMPETITIVE IP RADAR

Included with IDiyas Go Pro & Enterprise Plans. Monitor companies, CPC classes, and patent citations.

Quick Start: Open any company or technology page on IDiyas and click “+ Add to Radar”.
